

Dear Valued Customer,

Between recent tariffs on TCPP imported from China and the price increases of MDI, we are forced to make some adjustments to our polyurethane roofing adhesives. Effective November 1st, 2024 on all new orders, these products will see a price increase of 5%. Your sales representative will provide updated price sheets as soon as possible.

We understand that this price increase may impact your business. To ensure fair practices and prevent stockpiling, we have implemented a limit on pre-buying. Customers will not be able to purchase more than 10% above their average monthly purchases prior to the price increase.

For more information on the situation with the USITC and the Antidumping and Countervailing case against TCPP, please click [here](#). This situation is ongoing and may bring forth further changes of which we will keep you informed. Should you require any additional documentation, please reach out to your sales representative.

We appreciate your understanding as we navigate through this ever-changing environment. Thank you for being a loyal customer of ICP and for your ongoing support!

Thank you,

Monte Horst
