Dear Valued Customer:

We need to implement a price increase to absorb continued daily price increases in raw materials, shipping costs, and increased labor costs associated with inflationary pricing pressures. Since the beginning of the year, we've had at least one price increase if not multiple price increases from our suppliers.

For those customers purchasing out of our Ohio operating facility, a change in multiplier will represent an approximate 7% - 8% price increase. This pricing change will be **effective with all orders placed on or after Saturday, April 2, 2022.** Some additional features and options will see additional price adjustments beyond this percentage increase due to rapid acceleration in their costs.

We remain committed to our customers and providing you with relevant product offerings and servicing your business. Everyone at Vinylmax thanks you for your business, our partnership, and allowing us to serve your product needs over the years.

Sincerely:

A handwritten signature in black ink that reads "Scott Jeffrey".

Scott Jeffrey
Director of Sales, Vinylmax Windows
